## CHARACTER DRIVEN DESIGN

Maisha Design was approached by the clients to redesign their three-bedroom London riverside residence into an apartment full of character and with an edge to the interiors. Being their second home, they were eager to create a unique and bold interior to suit its location and the actual building using a variety of materials. The interior is therefore distinguished by beautiful bespoke furniture with an emphasis on the use of natural materials such as brass, copper, wood and horn throughout. To elevate the apartment, Maisha chose a striking colour palette throughout which is stunningly complemented by the clients' extensive art collection.

### A PLACE TO ENTERTAIN

This client's Tower Bridge riverside three bedroom lateral apartment is situated in the famous and listed Butlers Wharf building with beautiful exposed brick and characteristic cast iron windows. Situated on the third floor, it has a stunning view of Tower Bridge, which is just 200 metres away, and provides the perfect backdrop for a Maisha interior design. The clients wanted their London home to be a place for entertaining their family and friends, a space that was exciting and spectacular where they could be very comfortable. The project took one year to complete and included a full reconfiguration of the floor plan, electrical plan and bespoke furniture and finishes. This project was shortlisted in the 2016 UK Property Awards in the Best London apartment category.
